the same motif appears in *both* classes: no separation

→ intervention

motif-only AUROC 0.53 (E-box, human_ocr_ensembl)

same motif count: the signal is *where*, not *what*

→ intervention

position-binned *k*-mers, MCC 0.24 → 0.84 (splice)

the *negatives* are an AT-rich compositional draw

→ intervention

equalize composition, MCC 0.46 → 0.06 (cohn)
